

Ultherapy Testimonial

I started coming to Dr. Boyd about 10 years ago at the recommendation of a friend. At the time, I was thinking about having a mini face lift because I was dissatisfied with the appearance of my lower face and neck. Dr. Boyd suggested instead that I have Sculptra injections to add a little volume to my face and increase collagen production. I did that and was very happy with the results. A few years later I had Dr. Boyd resect a large scar on my neck that was from thyroidectomy surgery I had when I was 22. I had always been self-conscious about it. He did a beautiful job. The scar is almost invisible now.

Two years ago I started seeing articles on Ultherapy. I was especially dissatisfied with the appearance of my neck, and so I decided to have the procedure on my face and neck. My esthetician was great, very professional and reassuring. The procedure felt like little electric shocks to my skin, uncomfortable at times but never really painful, and the results were amazing! My face was slightly red for a day, and I didn't notice an immediate improvement, but gradually my face became smoother and more firm and the creases disappeared in my neck. It's now two years later and I still look better than I did before I had Ultherapy. I will definitely have this done again if and when I need it and would recommend it to anyone! I am almost 70 years old and am told frequently that I look much younger. Thank you Dr. Boyd!
